NSRA Press Package

The single reference for reporting on The American Deal and the National Sovereignty and Resilience Act

36 titles · 218 sections · fully costed · owned by no party
Every figure traced to source · scoring pending
Press v2.0 · July 2026

The American Deal — What America Owes You™
A program of TheAmericanDeal, Inc. — a Wyoming 501(c)(4) civic-education organization

At a Glance

The American Deal is the public campaign for the **National Sovereignty and Resilience Act (NSRA)** — a citizen-authored federal framework of 36 titles and 218 sections. It restores fiscal sovereignty and delivers material household benefits without adding to the deficit, funded by recapturing value that currently leaves the domestic economy rather than by new broad-based taxes. It is finished, fully costed on published government baselines, and owned by no party. A program of TheAmericanDeal, Inc., a Wyoming 501(c)(4).

Key Figures — With Sourcing

Claim	Figure	Basis
Year-1 annual revenue	**$749B**	NSRA model on CBO/JCT/OMB/Treasury baselines
Annual deficit reduction	**$554B**	NSRA model; sensitivity-tested
Balanced budget (central est.)	**Year 4**	Low/base/high scenarios
Americans in Year-1 relief	**79M+**	28M uninsured · 42M SNAP · 9M veterans
Federal drug-pricing savings	**~$55B/yr**	PNAS 2024 G7 price-differential analysis
Insulin price cap	**$35/mo**	Statutory text (Title XIII)
Corporate single-family housing cap	**50 units/metro**	Statutory text (Title XIV)
Small-business exemption	**< $10M rev.**	Statutory text (Covered Entity)

Figures are NSRA model estimates on published baselines — internally modeled and sensitivity-tested, not yet officially scored; scoring pending. Statutory parameters (e.g., the insulin cap) are bill text, not projections.

How the Figures Are Justified

The headline revenue is not a new tax — it is the sum of 12 scored base revenue streams plus supplemental enforcement recapture, each on a published baseline: restoring the corporate rate, collecting taxes already owed (IRS enforcement), a multinational minimum tax (OECD Pillar Two), closing the carried-interest and stepped-up-basis loopholes, G7 pharmaceutical parity, mineral-royalty modernization, and fraud recovery. Gross stream revenue of roughly $785B nets to ~$749B after conservative realization and program-linked costs, and to ~$554B in deficit reduction after about $204B in revenue-funded outlays. Every stream is itemized in Schedule G with authority, source, and confidence.

The Honest Bottom Line — Three Frameworks, Three Outcomes

Clinton started with a $290B deficit and closed it in six years — with the dot-com boom providing an estimated 25–35% of the improvement. The NSRA starts with a $1.9T deficit (6.5× Clinton's challenge) and no tech boom, yet generates ~$554B/yr in deficit reduction — nearly 10× Clinton's ~$60B/yr average — while also delivering coverage, drug relief, and a household dividend. Unlike the OBBBA, the alternative to the NSRA isn't 'six years.' It's never.

Metric	Clinton era	Trump OBBBA (2025)	NSRA 2028
Deficit trajectory	$290B deficit → $69B surplus by 1998 (~$60B/yr)	CBO: +$3.3–3.8T over 10 yrs; no balance target	**$554B/yr reduction; balanced Year 4**
Balanced budget	Year 6; dot-com tailwind	Never	**Year 4 (range 3–5)**

Metric	Clinton era	Trump OBBBA (2025)	NSRA 2028
Household floor	None (EITC/min-wage)	MAGA accounts; SNAP/Medicaid cuts offset	**Child Prosperity Trust; $35 drug caps; 0% loan interest**
Healthcare floor	None; 40M+ uninsured	No new floor; ~10–15M lose Medicaid	**BMP: $0 premium for 28M uninsured**
Drug pricing	No controls	IRA negotiation only (10–20 drugs/yr)	**G7 parity; compulsory licensing at royalty**
10-yr deficit impact	~$500B reduction over 5 yrs	+$3.3–3.8T to debt	**Multi-trillion reduction; surplus Year 4**
PE / monopoly	Microsoft antitrust; no housing cap	No PE limits; reduced antitrust budget	**PE barred from hospitals/EMS; 50-unit housing cap**
IRS enforcement	Stable; ~$60B gap	$80B IRA funding clawed back	**$15B/yr mandatory; supermajority-protected**

Why This Isn't Left or Right

The NSRA is owned by no party and was written outside the party system — to work, not to win a primary. Its planks draw cross-spectrum support: banning congressional stock trading, matching G7 drug prices, anti-monopoly enforcement, reshoring, veterans-first care, protecting Social Security, and reducing the deficit. Conservatives see sovereignty, small-business protection, anti-corruption, and fiscal discipline; progressives see affordability, worker protections, and corporate accountability.

Answering the “Socialism” Charge

• **Market-based delivery, not a takeover.** Universal coverage runs through competing private carriers (BMP) with a required medical-loss ratio — regulated competition, not nationalization.

• **No nationalization.** The bill does not seize companies; it caps corporate concentration, enforces existing law, and closes loopholes.

• **Property rights preserved.** Divestitures are market-rate and arms-length with an independent-appraisal right and Court of Federal Claims review. Pharma uses compulsory licensing with a royalty (patent retained), not expropriation.

• **Pro-small-business.** Firms under $10M and landlords under ten units are exempt.

• **Recapture, not redistribution.** Revenue comes from collecting taxes owed and recapturing value leaving the economy — not new broad-based taxes.

• **Fiscally conservative by result.** It reduces the deficit ~$554B/yr and targets balance by Year 4.

• **Earned, not unlimited.** The household dividend activates only as verified revenue arrives (tranche-based escalation lock).

What's In It for Every Household

$35 insulin regardless of insurance, G7-matched drug prices, a cap on Wall Street buying up starter homes, coverage for the ~28M uninsured, student-loan relief, and lower borrowing costs as the deficit falls — without new broad-based taxes. Two tools let anyone check the math: **the Sovereign Return Engine™** (household calculator at theamericandeal.org/calculator) estimates what a family receives; **the 7-Subledger Math Engine™** (interactive fiscal model at theamericandeal.org/adopt/fiscal) lets reporters toggle streams and set their own realization rate.

The Review Record

Before publication, every provision was pressure-tested: a Constitutional Red-Team against current Supreme Court doctrine, a Congressional Viability Audit, a Committee-Jurisdiction Analysis mapping all 36 titles, a Regulatory & Red-Tape Reduction Audit, a Fiscal Stress-Test (low/base/high), and an Implementation-Readiness Review. Internal review is complete and documented; independent constitutional review and official CBO/JCT scoring are welcomed and pending.

Founder

Santonio D. Sanders is the principal architect of the NSRA. His background is operational rather than political: ten years in the U.S. Navy submarine service; federal contracting in national-security and diplomatic environments; former VA ambulatory-care director leading the veteran-care referral continuum at a major federal VA medical facility; and author of the NSRA, written outside the political and lobbying system.

Core Messages

• **Deliverability, not ideology.** A promise the country can actually keep — real benefits in Year 1, the dividend only when earned.

• **Genuine revenue, not borrowing.** The bill funds itself by recapturing value leaving the economy, not by new broad-based taxes.

• **Stronger together — built to pass, and survive, in pieces.** As one Act the titles reinforce each other. For passage the agenda moves as five coordinated bills, each able to advance and deliver on its own; for durability, a severability clause (§205) keeps the rest of the Act in force if a court strikes any single title. Individual titles carry explicit dependency labels.

• **Visible evidence standard.** Every major claim is classified by source and review status; scoring is stated as pending, not implied.

Key Acronyms & Terms

Term	Definition
NSRA	National Sovereignty and Resilience Act
SIRF	Sovereign Infrastructure Reinvestment Fund
FMIA	Federal Market Integrity Administration
FDVM	Federal Data Veracity Matrix
BMP	Basic Minimum Plan (universal coverage)
HSF	Health Sovereignty Fund
SPI	Sovereign Productivity Index
NIMA	National Infrastructure Maintenance Assessment
FTT	Financial Transaction Tax (0.1%)

Term	Definition
FTA	Financial Transaction Assessment (0.02%, large institutional trades)
WEA	Wage Equalization Assessment
SDEC	Sovereign Defense Efficiency Commission
SCA	Sovereign Compute Authority
VSN	Veterans Sovereignty Node
CPT	Child Prosperity Trust
A.B.R.N.	Automated Environmental Remediation Network
V_abs	Volume Absorption Throttle (housing divestiture)
ALJ	Administrative Law Judge
MSA	Metropolitan Statistical Area
OASDI	Old-Age, Survivors & Disability Insurance (Social Security)
G7	Group of Seven (drug-price benchmark)
CBO / JCT	Congressional Budget Office / Joint Committee on Taxation
OMB / GAO	Office of Management & Budget / Government Accountability Office
Schedule F	Pharmaceutical compulsory-licensing royalty schedule

Evidence standard: Fiscal and impact figures are NSRA model estimates built on published CBO, JCT, OMB, GAO, Treasury, SSA, OECD, and peer-reviewed baselines — internally modeled and sensitivity-tested, not yet officially scored by CBO or JCT, which is pending and welcomed. Statutory parameters (e.g., the $35 insulin cap, the 50-unit corporate housing cap) are the text of the bill, not projections. TheAmericanDeal, Inc. is a Wyoming 501(c)(4) civic-education organization; materials are informational and non-partisan.
