The National Security & Resilience Act

Zero-Interest Student Debt Relief

The NSRA converts existing federal student loans to zero interest and makes all future federal loans interest-free, ending the structural wealth transfer from borrowers to the federal government.

Zero interest, not blanket forgiveness

The NSRA does not erase balances by fiat. Instead it eliminates interest, the mechanism that turns a manageable principal into a lifelong debt. Borrowers repay what they borrowed, nothing more. Public-service borrowers retain an income-based forgiveness path.

Why this is different

Interest elimination sidesteps the political fight over forgiveness while delivering immediate, durable relief. It makes higher education a real option again without adding the moral-hazard objections that stall forgiveness proposals.

How it fits the budget

Student-debt relief is funded within the NSRA's closed-loop fiscal architecture, alongside the Household Structural Relief provisions, without raising income taxes on households under $400,000.
