

Oversight & Reauthorization Summary

Accountability architecture and the reauthorization schedule

FMIA quarterly · GAO/IG · 7-year reauthorization

Oversight architecture

- FMIA files quarterly fiscal-management and reporting statements to Congress.
- GAO and Inspectors General conduct independent audit and review.
- A biennial CBO verification of household economic returns is directed by Section 002(5).
- SIRM capitalization and deployment are subject to statutory-trigger audit and reporting.
- The FDVM operates a phased-independence structure insulating enforcement from political interference.

Reauthorization

Major program authorities carry a seven-year reauthorization cycle with a scheduled audit and reporting cadence, giving Congress a periodic review-and-renew posture rather than an open-ended entitlement.

Evidence standard: Fiscal and impact figures are NSRA model estimates built on published CBO, JCT, OMB, GAO, Treasury, SSA, OECD, and peer-reviewed baselines — internally modeled and sensitivity-tested, not yet officially scored by CBO or JCT, which is pending and welcomed. Statutory parameters (e.g., the \$35 insulin cap, the 50-unit corporate housing cap) are the text of the bill, not projections. TheAmericanDeal, Inc. is a Wyoming 501(c)(4) civic-education organization; materials are informational and non-partisan.
